Description:

Thanos was born on the 25th day of Desnus in 4702. He is ironically named; in Mumsy's first trimester she
was unaware of her pregnancy, conducted a mission into Geb while subject to an "Undead Anatomy" effect,
and Thanos shows subtle signs of undead taint.

The whole family sees Thanos as something of a wash-out, and have been putting pressure on him to get
some sort of backbone. Thanos's mother, with some sort of connection to an order of Scouts called the
Pathfinders, make Thanos join up. And Auntie Rouen Stought, Lictor and head of the perfectly ghastly Order
of the Pyre, has made Thanos join the Order of the Pyre, appointing him Legatus in charge of certain
ceremonial functions, and is getting him fitted for Hellknight armor, promising father to "make" something
of him.

Thanos, of course, thinks that he should have some say as to whether or not anything will be made of him.
But not wanting to upset the family or lose his stipend, he plays the part of a dutiful Pathfinder and
Hellknight.
